

Contributing to a Project Plan

Name:

Think about your experience when you were project planning and briefly explain:

1. What was your role in the project? What jobs did you do?

2. How did you monitor progress in your team and keep everything on track?

3. What part of the project made you feel happy?

4. Did you experience any stress or difficulties with other people in your team and if so how did you deal with it?

5. What have you learnt from being involved in the whole project? List as many things as you can

6. What would you do differently if you had the chance to do it all again?
